

KISA NDIS INFORMATION

Learn how KISA devices can help people with disabilities live better. For more details, please visit ndis.kisa.com.au

WHY CHOOSE KISA?

At KISA, we are not just about technology. We are dedicated to enhancing the daily lives of our customers and NDIS Participants, ensuring they feel supported, empowered, safe, confident, and independent.

We achieve this by providing assistive telecommunication technology designed in collaboration with community leaders, professionals and significant associations and organisations that support people with disabilities.

KEEPING IT SIMPLE, ALWAYS

KISA empowers NDIS participants with two innovative, award-winning products that are ready to use right out of the box.

Our user-friendly online MyKISA customer portal and MyKISA Android and iOS app make setting and controlling devices a breeze.

Our friendly and professional customer support team is always ready to provide guidance and high-quality customer service.

KISA

- EASY TO USE
- PEACE OF MIND
- FALL DETECTION
- SUPPORTS INDEPENDENCE
- NDIS APPROVED ASSISTIVE TECHNOLOGY

KISA SERVICES: KEY TO YOUR PEACE OF MIND

At KISA, we understand the importance of simplicity, especially for seniors and people with disabilities. With our devices, users can access the latest technology enabling them to live more independently and connect with their support network at the touch of a button.

KISA GPS Location Tracking

With KISA devices, you can always keep track of your loved one's location, especially if they are prone to wander or lose their way. Our devices have GPS tracking capability for your convenience and peace of mind.

KISA Shield

KISA Shield protects the most vulnerable people in your life from scams, fraud, and nuisance callers. Our innovative technology lets you easily create a personalised list of approved or blocked numbers, ensuring the user is always secure and protected.

KISA Reminders

Send automated text-to-voice reminder messages daily to a registered KISA device so your family member or client remembers to take medication, attend appointments, eat, drink, exercise, etc.

KISA FALL DETECTION

KISA devices are equipped with an advanced fall detection system that uses sensors and algorithms to accurately identify falls and trigger alerts.

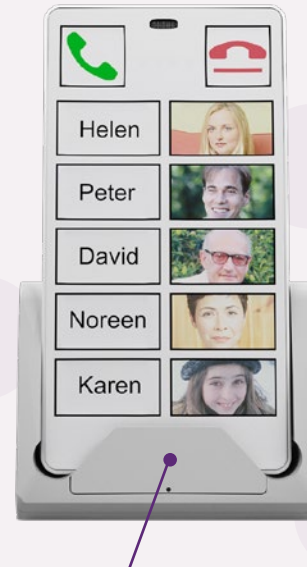

Studies have shown that when such a device supports those most prone to experiencing a fall, they experience a boost in confidence, enabling them to actively live independently and with increased social capacity.

KISA DEVICES APPROVED FOR NDIS PARTICIPANTS

We offer two distinct but equally valuable products designed to keep users safe and secure
