

KEEPING IT SIMPLE, ALWAYS

KISA: the award-winning, simple-to-use mobile phone.

Developed initially to help our family members cope with difficulties using current mobile phones, KISA is the first Australian-made device to make mobile technology accessible to everyone.

Simple and intuitive, each KISA device is made-to-order and designed to be used straight out of the box; no complicated manuals required.

KISA is a Registered NDIS Provider and complies with Victorian and Commonwealth Government requirements for the delivery of quality and safe services.

Over the years, our services have empowered thousands of NDIS participants, fostering independence, confidence, and connection.

DISCOVER NEW OPPORTUNITIES

With a KISA device, you can confidently step out of the house thanks to our built-in fall detection and SOS functions.

Whether our KISA phone or Personal Alarm, these functions encourage confidence and independence, enabling you to socialise with peace of mind.

KISA is able to provide this support thanks to various funding partners, such as the NDIS and other government agencies.

If you want to learn more about the cost of the KISA device and its optional services and accessories, please visit kisa.com.au

KISA

- EASY TO USE
- GAIN CONFIDENCE
- BE INDEPENDENT
- PEACE OF MIND
- STAY CONNECTED

MORE THAN JUST A PHONE

At KISA, we understand the importance of simplicity, especially for seniors and people with disabilities. With our devices, users can access the latest technology enabling them to live more independently and connect with their support network at the touch of a button.

KISA GPS Location Tracking

With KISA devices, you can always keep track of your loved one's location, especially if they are prone to wander or lose their way. Our devices have GPS tracking capability for your convenience and peace of mind.

KISA Shield

KISA Shield protects the most vulnerable people in your life from scams, fraud, and nuisance callers. Our innovative technology lets you easily create a personalised list of approved or blocked numbers, ensuring the user is always secure and protected.

KISA Reminders

Send automated text-to-voice reminder messages daily to a registered KISA device so your family member or client remembers to take medication, attend appointments, eat, drink, exercise, etc.

KISA FALL DETECTION

KISA devices are equipped with an advanced fall detection system that uses sensors and algorithms to accurately identify falls and trigger alerts.

Studies have shown that when such a device supports those most prone to experiencing a fall, they experience a boost in confidence, enabling them to actively live independently and with increased social capacity.
