

DESIGNED FOR NDIS PARTICIPANTS

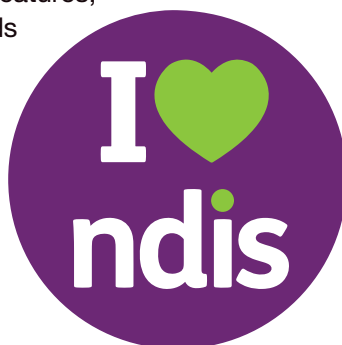

Recognised as a low-cost assistive technology under the NDIS, KISA Companion offers a dependable and accessible way for participants to stay connected with their support networks.

It's simple, customisable design replaces the complexity of modern devices with clear, tactile buttons and easy operation, ensuring communication is always straightforward and reliable.

COMMUNICATION WITHOUT BARRIERS

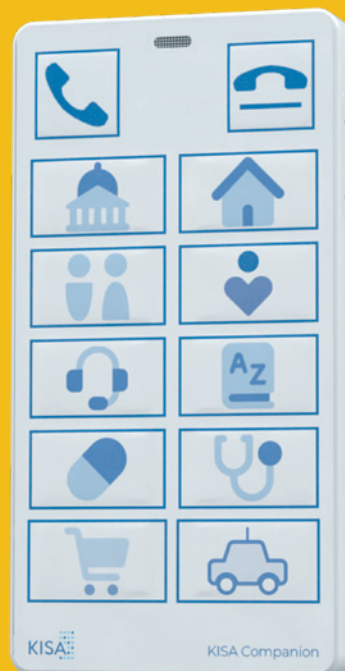

KISA Companion is designed for people with diverse needs, from cognitive and neurological conditions to physical, visual, or hearing impairments. By simplifying communication, removing complexity and offering clear, accessible features, it reduces stress and builds confidence.

With KISA Companion, connection becomes effortless, empowering users to feel safe, supported and in control.

STAY CONNECTED, STAY SAFE

KISA Companion empowers users to live with greater independence, confidence, and connection. It makes communication, safety, and daily routines easier to manage while supporting users and giving families and carers peace of mind. Key ways it enhances everyday life include:

- **Supports independence** – empowers users to communicate effectively without relying on complex devices or constant assistance.
- **Promotes inclusion** – enables individuals participate more fully in social, community, and family life.
- **Builds confidence** – empowers users to take greater control over their communication and interactions.
- **Reduces frustration** – intuitive tactile buttons make communication simpler and less stressful for users.
- **Enhances safety** – SOS and emergency features ensure help is always accessible when needed.
- **Supports daily routines** – KISA Reminders for medication or important tasks help users stay on track.
- **24/7 Monitoring** – professional monitoring ensures help is dispatched quickly when needed.

SAFETY IN EVERY CALL

KISA Companion does not provide internet access or a keypad for unrestricted calling. This ensures NDIS participants cannot accidentally or intentionally dial unapproved numbers.

Instead, the device allows contact with up to 10 trusted family members and support workers whose numbers are pre-programmed, giving participants reliable access to the right people while offering comfort and assurance for carers and loved ones.

SIMPLE, RELIABLE & ACCESSIBLE FEATURES

Tactile Buttons

Large mechanical tactile buttons can be customised with any text, images, or braille.

Easy to Use

No screen, complicated menus, or apps. Just one button per contact for instant communication.

Charging Cradle

Convenient and easy to use for people with dexterity issues.

Volume Control

Adjust the call volume using dedicated buttons.

Auto-Loudspeaker

The KISA Companion can be set to answer all calls in loudspeaker mode.

Essential User Information

Include vital personal, health and contact info on the back panel.

SOS Button

When pressed, connects users with 24/7 monitoring service or emergency services.
